

Today's agenda for student success needs a better representation of the what and how of student success. The "Increased Student Success" driver diagram* is a conceptual structure that offers a comprehensive representation of the key components for student success, emphasizing how student success will be achieved and the extent to which efforts are aligned and integrated. **How aligned is TS³?** Map the connections between primary drivers and your activities associated with TS³ interventions: Guided Pathways Using Predictive Analytics, Redesigning the Math Pathway, and High Impact Practices for All Students. Are all your TS³ activities connected to a primary driver? Which drivers have the strongest connections? What would help increase connections between your TS³ activities and the primary drivers for Student Success?

* Driver diagrams are a visual representation of a proposed solution path to address a particular problem or challenge. It is a type of structured logic chart with 3 or more levels including (a) description of a goal or desired outcome, (b) specification of the major causal explanations (drivers) to reach or realize the goal, and (c) specific activities or interventions (secondary drivers) that could create the conditions to realize the desired outcomes
